Key Features of Retail click

1) **Stock Inward:** Purchase order for inward stock from suppliers/vendors to manage product margins, DP rates, and delivery stock.

2) **QR Code Generate & Print:** Create QR codes, product labels, and barcodes for product packaging. A QR code provides you with an easy way to search for your product during billing.

3) **Inventory Management:** Inventory management is the process in which you track your products' locations. To manage quantities of each product type to improve profit margin by management.

4) **Manage Supplier Account:** Monitor supplier or vendor performance and look for cost-cutting opportunities. Easy access to supplier's historical data, including published price, margin price, and so on last cost paid.

SB Creation
ISO 9001 : 2015 Certified

5) **Store Inform Stock Transfer From Warehouse:** You can see and manage which store products are required. The store gives you the quantity of products that you require and tracks which products have been delivered to the store.

6) **Multi Store Management:** It is simple software that allows you to track branch-specific sales, purchases, and returns. Inventory, receivables, and profits can be viewed from any location. completely scalable to meet the growing needs of the retailer, improved visibility and control over outlet operations.

7) **Multi Warehouse Management:** It is easy-to-use software that allows you to monitor stores' purchases and where stocks are required. You can also manage stocks that are delivered to branches or stores.

8) **Reports:** We can view all of the store's reports in this section. In this we can see reports regarding stock, product damage, product expiry, missing products, GST reports, various types of tax reports, supplier/vendor and payments.

9) **Security:** Access to store data is configurable per role or user-based. Multiple levels of security are available, with the option to set a password for login.

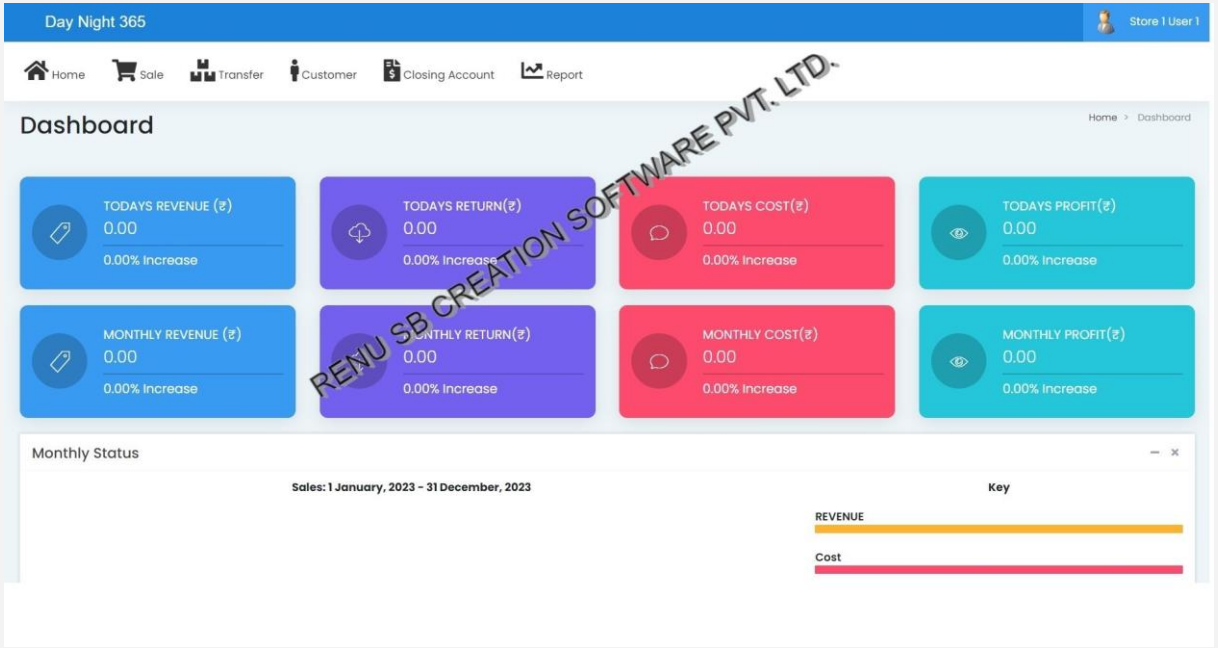
User Dashboard



RENU SB CREATION SOFTWARE PVT. LTD.

A retail store user dashboard is a web-based interface that provides an overview of various data and metrics related to the operations and performance of a retail store. It allows store owners, managers, and employees to monitor key performance indicators (KPIs), analyze trends, and make data-driven decisions to improve the store's efficiency and profitability.
